I have developed this form to use to exchange genealogy information using e-mail rather than s-mail. Where you find a mistake or need to add information just correct it by putting bracket [] marks around where you make the correction or add the data. Where you add information please list a source, if available. You will probably find it easier to move around inside the form with your arrow keys. PLEASE post your response to the net so all can see. Again thanks for all your help on this genealogy project.

best regards
